IGHV1-69 - immunoglobulin heavy variable 1-69 BETA

Homo sapiens

Summary Gene ontology

Download datasets API

Gene name
immunoglobulin heavy variable 1-69

Gene symbol
IGHV1-69

GeneID
28461

Organism
Homo sapiens (human)

Gene type
other

Synonyms
IGHV1E, IGHV1-E, IGHV169

RefSeq summary

Predicted to enable antigen binding activity. Predicted to be involved in immunoglobulin mediated immune response. Predicted to be located in extracellular region and plasma membrane. Predicted to be part of immunoglobulin complex. [provided by Alliance of Genome Resources, Jul 2025]
