[datasets](#)

[API](#)

Gene name

immunoglobulin heavy variable 4-31

Gene symbol

IGHV4-31

GeneID

28396

Organism

[Homo sapiens \(human\)](#)

Gene type

other

Synonyms

IGHV431

RefSeq summary

Predicted to enable antigen binding activity. Predicted to be involved in immunoglobulin mediated immune response. Predicted to be located in extracellular region and plasma membrane. Predicted to be part of immunoglobulin complex. [provided by Alliance of Genome Resources, Jul 2025]
